PLANNING SERVICE

Plant with a plan, designed by experts at no additional cost. Let us custom-design a landscape plan for your home. An initial charge of \$10-25 should cover the cost of plans and the entire amount will be refunded with the purchase of the plants.

GUARANTEE

We guarantee to replace, once at $\frac{1}{2}$ the original price of plants and labor, all trees, shrubs, evergreens, and roses which fail to survive the first growing season, providing the plant has received normal care and the amount is paid when due. All other plants are not guaranteed. Plant failures must be reported by August 1 following planting.

YEWS (TAXUS)

More and more yews are planted each year, as people appreciate their many good qualities. They are available in a wide variety of shapes from low spreading kinds to tall pyramids. Yews are rather slow growing and a light pruning each spring before the growth starts will keep them in bounds. They are disease and insect free. They should be fertilized in early May with a complete fertilizer.

YEW, HICKS - 20'

Taxus media hicksi

One of the best yews. Columnar in habit. Dark green foliage with bright red berries in fall.

SHADE TREES

In the past, large, fast-growing trees were planted and the small and medium growing trees were ignored. Today the trend is toward smaller trees and with good reason, since their form, color, and foliage is unlimited. They also are best-suited for use in landscaping our generally smaller, lower, modern homes. Unless otherwise indicated, prices are for bare root trees. Add \$1.00 to bare root prices if tubbed in ½ bu. basket or equivalent; \$1.50 in 1 bu. basket or equivalent. See B&B price schedule on last page of catalog for additional charge if tree is to be balled and burlapped.

AMUR CORK TREE - 50' *Phellodendron amurense*

FERTILIZERS

The following fertilizers are used by us in our green-houses and landscape work. You can be sure of their performance. For lawns, we highly recommend using fertilizer containing ORGANIC nitrogen, which is longer lasting and less apt to burn the grass than farm or straight chemical fertilizer. Ask for special prices on large quantities.

MULCHES AND SOIL CONDITIONERS

PEAT MOSS

Used extensively by professional and amateur gardeners both as a mulch and as a soil conditioner. Used as a mulch, it helps retain moisture and keeps down weeds; as a soil conditioner, it lightens heavy soil and improves the texture of light or sandy soils.

STRAW

Used primarily for mulching newly seeded lawns, or for winter protection of tender plants.

	Called for	Delv'd
1 bale -----	\$1.00	\$1.50

VERMICULITE ("Terra-Lite")

Treated for horticultural use. Very attractive mulch for roses, etc. Also used as a growing medium to start seeds, for lightening heavy soil, and for storing bulbs.

4 qt. -----	\$.39
½ bu. -----	.89
4 cu. ft. -----	2.35

½ bale -----	3.00
1 bale -----	5.00

TOP SOIL

Unfortunately top soil is becoming more difficult to obtain each year. The top soil we offer is used successfully in our greenhouses and landscaping work. Although it often does not have the dark color nor medium texture customarily associated with top soil in years gone by, this does not seriously detract from its usefulness for lawns or general planting.
